**Re: Concept II and Ranger – Approval of a variant that records to CF card instead of DVD**

We are pleased to inform you that these changes are acceptable, and no further testing will be required before the amendment can be used. We understand that you will no longer manufacture or sell the DVD version of these units, but that you will continue to support customers using the DVD version. All new builds will use the new parts and the new software, but you may use stock of old hardware to repair existing units. The DVD version may continue to use the previously approved version of the MUC software (version 2.0).

Our records will be amended to incorporate these changes. Revised copies of the Ranger and Concept II schedules accompany this letter, to which you will now be bound.

Ian Humphrey
